EXPERIENCE

Team Leader FullStack

Sigma

07/2024 – Present

- Led full-stack enhancements for lebara.sa , a telecom platform, focusing on performance, security, and user experience.
  - **Bug Fixing and Optimization:**
    - Resolved multiple bugs in the login, quick login, and OTP processes by reworking the code to ensure proper security and reliability.
    - Enhanced the Entertainment page performance, reducing overloading issues and improving user experience.
    - Fixed the payment gateway integration by updating APIs and ensuring smooth and fast transactions.
  - **Backend & Database Enhancements:**
    - Developed features using **Node.js** and **GoLang** to support scalable telecom backend services.
    - Worked with **SQL and NoSQL databases** to optimize performance and ensure data integrity.
    - Integrated **Firebase** for real-time functionality in the Lebara system.
  - **Dashboard Improvements:**
    - Addressed issues in the prepaid and postpaid plans on the dashboard, making them more user-friendly and efficient.
  - **Change Requests:**
    - Managed several CRs, including:
      - **Hide and Show Options:** Implemented a configuration allowing users to see certain features based on their subscription status using Strapi.
      - **VAS Page:** Created a custom VAS page from scratch for services like OSN and Anghami.
      - **Regulation:** Added OTP verification for all payment transactions to enhance security.
      - **NAFAZ Integration:** Collaborated with the Saudi government to integrate NAFAZ for SIM activation.
  - **Team Leadership:**
    - Promoted to Team Leader, overseeing the team's work and ensuring smooth workflow.
    - Conducted regular code reviews to maintain high code quality and clean code practices.
    - Mentored team members, providing guidance and support to improve their skills.
    - Managed task delegation and monitored project progress, ensuring timely delivery and adherence to best practices.
    - Addressed and resolved complex technical issues, facilitating a collaborative and productive team environment.

- Developed and enhanced critical areas of the Red Bull Mobile telecom platform, focusing on both frontend and backend https://redbullmobile.sa/
  - **Key Responsibilities:**
    - Rebuilt the authentication system and resolved critical bugs in user login and authorization flows.
    - Integrated Strapi as a content management system to allow dynamic content control.
    - Fixed authorization logic across both the user dashboard and admin panel.
  - **Feature Additions:**
    - Enabled multiple SIM card support in the dashboard.
    - Added new postpaid features, including plan customization and upgrade capabilities.
    - Implemented a package change flow, allowing users to modify their plans directly through the UI and backend logic.
  - **Impact:**
    - Improved user engagement and admin efficiency.
    - Strengthened overall platform security and performance.
    - Enabled full control over Postpaid and Package management (CRUD) through the Strapi CMS, enhancing flexibility and reducing dependency on developers.

Team Leader Frontend

MG Group

12/2023 – 06/2024

- Developed and implemented a comprehensive dashboard featuring advanced functionalities for efficient website management.
- This dashboard Manges mobiles App which are clothes, cosmetics celebrities and jewelry, these apps contain coupons and booking for appointment.
- We have also created a salon app that allows salon owners to add their salons and manage them in their own dashboard and insert their details, this app let to customers to book an appointment, We had some issues while making this app, but we solved it.
- I led a team of 6 people to implement the project, I assigned them daily tasks, checked and helped them solve difficult tasks.
- Check the quality code, timeline, and improve the performance.
- Facilitate the development of new features and integration of authentication systems to ensure strong security and user customization within the dashboard.

Senior Frontend Developer

Houya For Information Technology

11/2023 – 05/2024

Part-time

- I created a Karaz website that had some problems and I solved them, such as authentication, refreshing the token, storing goods, and posting and canceling orders in the dashboard.
- This is the URL of the website v1 Homepage - Karaz.
- I created a website called the portal, which is for merchants displaying their own exhibitions, and the User has the right to reserve booths for each exhibition. I created a complete dashboard for the admins and a dashboard for the User. I used React, Redux Toolkit, and other features.

  Project Overview:
  1. Purpose: A unique platform for merchants to display their exhibitions, enabling users to reserve booths.
  2. Impact: Facilitated increased merchant-user interaction and streamlined the exhibition reservation process.
- **Technical Contributions:**
  1. Admin Dashboard Development: Designed and implemented a comprehensive dashboard for administrators to manage exhibitions and user interactions.
  2. User Dashboard Creation: Developed a user-friendly dashboard, allowing users to easily reserve booths and interact with exhibitions.
- This is the URL that is in development mp.tasksa.dev.homePage

Senior Frontend Developer

Euruq Alsahra

10/2023

- Developed and implemented a comprehensive dashboard featuring advanced functionalities for efficient website management.
- Successfully designed and launched this website dnndon.com, showcasing proficiency in web development and user interface design.
- Collaborated with the team to enhance website performance, resulting in improved speed, efficiency, and user engagement.
- Contributed to the development of new features and the integration of authentication systems, ensuring robust security and user customization capabilities within the dashboard.

Senior Frontend Developer

Startup Defenders

02/2023

- Working mainly on a management system handling IOT devices with a reporting system and real time notifications.
- Implementing new features to enhance user experience.
- Cooperating with my team tackling problems and suggesting solutions from a different perspective.

Projects:

- saferoad.com Cold storage management system. Cold Chain (saferoad.com.sa)
- Saferoad.com car fleet management system.
- Car renting web application.
- Link ccm: https://track.v6.saferoad.net

Mid-Level Frontend Developer

Shoppex

06/2022

- I created add to cart page and a page responsible for storing data in Redux.
- Help the team to improve the performance of the site better.
- Share information, add a new feature, and add authentication to the dashboard.

Mid-Level Front end instructor

X_Team

09/2020

- Explain programming languages Html ,Css ,Js, React js.
